

The diagram illustrates a print artboard layout. It features a central white rectangle representing the 'Safe Zone', which is enclosed by a solid light green border. This central area is surrounded by a larger white margin, which is further enclosed by a dashed yellow border. The entire composition is set against a solid red background, which represents the 'Bleed Area'.

SAFE ZONE

Keep the most important details within the Safe Zone to avoid having them cut off.

Must fill the entire artboard (including the red Bleed Area) if you want the print area completely covered with your design.
